By @jstn

	<p>Find an image of your player online. Preferably, there will be contrast between the subject and the background. This will make it so there is a clean cutout of the player. Save this image to Camera Roll.</p>
	<p>Go to remove.bg and upload your image, this will automatically remove the background from your player image.</p>

	<p>Download the image to camera roll. Just click download, as “download HD” makes you get an account and we don’t need all that.</p>
	<p>Go to the app store and download an app that allows you to superimpose / overlay images. “PhotoLayers” is free with ads and is what I used here (I usually use photoshop)</p>

Within the app, you can upload the background you downloaded from my Google Drive, and the player image that we downloaded from the background remover website. Center the image on the canvas and size it as you need.
